## ■ ABOUT US / HAKKIMIZDA

Haksan was established in Bursa, Turkey in 1988 by İbrahim GÜLMEZ, who is still the chamber of the boards, to produce rubber parts for the automotive sector.

The production adventure, which started with the compression molding method, developed in parallel to the changes in the sector and today it has become active in areas such as home appliances, construction, railways and defense industry as well as the automotive sector with injection molding of rubber elastomer, hose parts that have been strengthened with extrusion profile and textiles.

Haksan applies its own rubber recipe and produces rubber in its own factory. Rubber production in Turkey is one of the leading companies. Therefore, it provides a significant cost advantage in the production of rubber products.

Today Haksan serves its customers with its approximately 700 employees in Manisa and Russia centers with administration center in Bursa at 42.500 m<sup>2</sup> closed production area. With a turnover of 55.170.000,00 € in 2018, it ranks 118th among the companies in Bursa.

Our company which is one of the Haksan Group companies Hann Dağıtım Otomotiv Yedek Parça San.ve Tic.A.Ş. is manufacturing high quality Air Suspension System for the automotive industry like "Rolling Lobe Air Springs", "Roll-Metal Lobe Air Springs", "Multi-Convolute Air Springs" and "Cabin Air Springs" under the brand name "HANN" for busses, heavy-duty trucks, trailers, light commercial vehicles as well as for industrial applications. Our company is located in the Organized Industrial Zone.

Besides being a manufacturer, Hann Otomotiv is also a distributor for the brands that it has a strong partnership. Through the customer needs and demands, we provide and deliver the spare parts of trucks and trailer to our customers

The Hann brand has ISO / TS 16949: 2012 quality accreditation and aims to provide better service without sacrificing quality.

Hann, who made the ' to improve innovation continuously' as a principle, manufactures suitable with international quality standards and advanced analysis techniques. At that point, we pass our products through many tests and submit them to your valuable business partners.

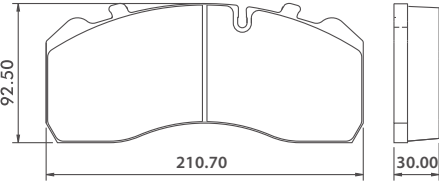

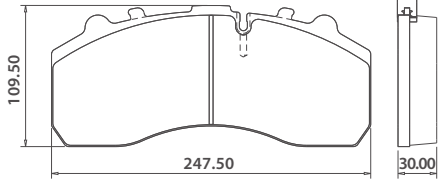

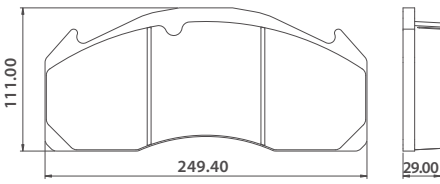

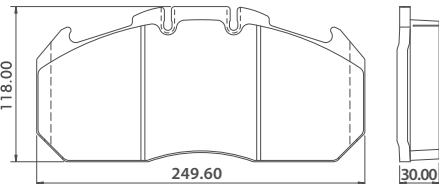

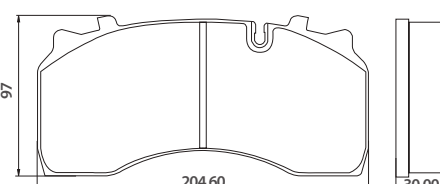

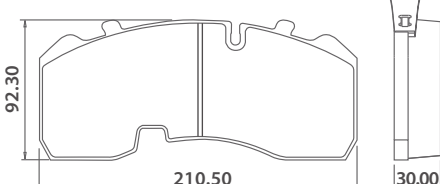

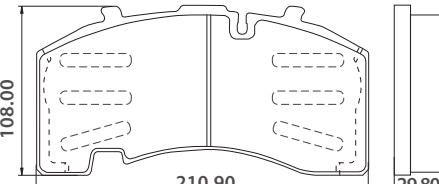

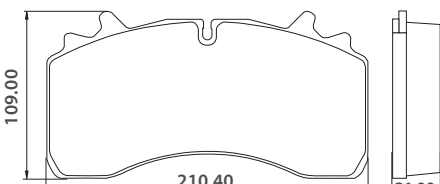

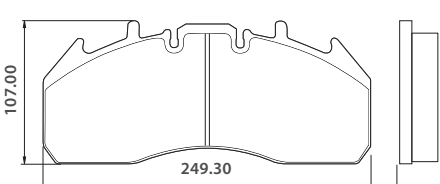

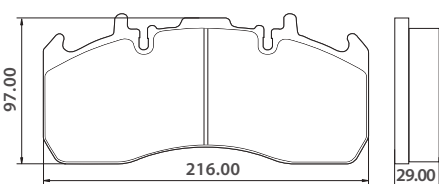

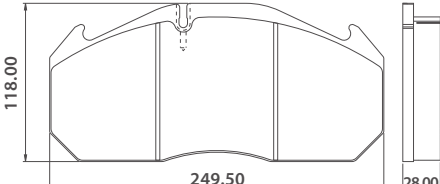

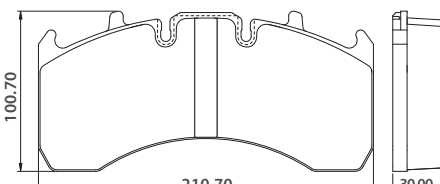

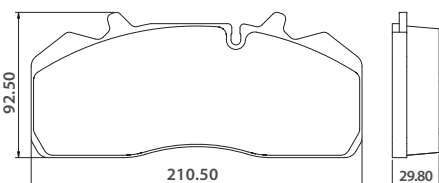

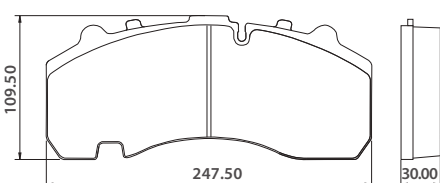

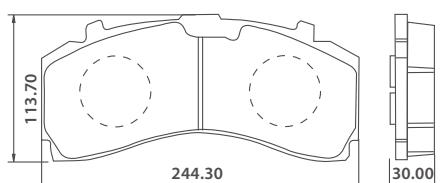

At the same time, we guarantee that our products are manufactured in accordance with the original standards and also provide easiness of mounting.
